

I use SONIC as my ISP in Santa Rosa, and hve for over 6 years. They are a stellar example of an innovative, highly customer service oriented, small to medium sized company. Its important to me that they continue to have fair and free access to reselling DSL, and its important to continue to regulate the few large players so they dont SQASH the smaller companies, as they are in an unfair position. They will get lost in the shuffle if you tey and deregulate the few larger companies. Please continue to support the smaller players.
